**Press Release: 2024 US Presidential Election Ballotpedia/FEC  
Incorrect and Deceptive Reporting**

Dear Media Company Reporter,

In the summer of 2024, **Ballotpedia.org** was reporting that approximately **1,334** candidates were registered 2024 presidential candidates:

[https://ballotpedia.org/List\\_of\\_registered\\_2024\\_presidential\\_candidates](https://ballotpedia.org/List_of_registered_2024_presidential_candidates)

And they are still reporting that.

The FEC states that "An individual running for a seat in the House or Senate or for the office of U.S. President becomes a candidate when he or she raises or spends more than \$5,000 in contributions or expenditures."

## House, Senate and presidential candidate registration

An individual running for a seat in the House or Senate or for the office of U.S. President becomes a candidate  $\varnothing$  when he or she raises or spends more than \$5,000 in contributions  $\varnothing$  or expenditures  $\varnothing$ . Money raised and spent to test the waters does not count toward this dollar threshold until the individual decides to run for federal office or conducts activities that indicate he or she is actively campaigning rather than testing the waters. The \$5,000 threshold is reached when:

<https://www.fec.gov/help-candidates-and-committees/registering-candidate/house-senate-president-candidate-registration/>

Since I was one of those candidates and consider myself highly trained and qualified for the U.S. Presidency, I dug into these numbers this week (I employed my software engineering skills to dig into this data as it is quite complicated to extract this information). I found that only **91** of them has passed that \$5,000 threshold to become a candidate and that I ranked #50 in highest "receipts".

Furthermore, when just looking at the list of Democratic Party Candidates who have passed the \$5,000 threshold, there were only 14 (which included former President Joe Biden) and I ranked #8 in highest "receipts".

I've attached my main research documents on this subject. A list of the 1,336 candidates, the list of the 91 official FEC candidates and the list of the 14 Democratic Party FEC Candidates.

This reporting by Ballotpedia is deceptive and incorrect and **has certainly harmed my campaign** by hiding me in a big list of non-sense and not serious or properly trained candidates. I could dig even deeper to see how many of these candidates have been in other races and have passed the \$5,000 FEC candidate threshold multiple times as I have in 2018, 2020 and 2024.

I'm bringing this to your attention in hopes that you can inform the public and expose Ballotpedia on their inaccurate reporting.

Another interesting thing to note is that you can do a search on the [FEC.gov](https://www.fec.gov) site for "RAND" in the upper right corner search box. It shows Rand Paul of course and there is a "view more" button to the right of his name with 230 results. When you click that, you can then filter by "president" on the left menu. That filters it down to 25 results. There are only 4 of us that have significant financial activity. Me, Rand Paul, Randal Terry and one other.

I'm considering a run for US Senate against Senator Jeff Merkley. I'm currently a registered Republican since I have always stated that I am a moderate/centrist politician and have yet to receive any contributions from anyone other than myself. My data sheets that I have provided show some details of how the other candidates stack up.

Sincerely,

**Rachel Lydia Rand**

US Presidential Candidate
